As a Full stack web development student, I hope to bring my skills and knowledge learned and apply them to a position where I can continue to excel and grow.

Technical Skills

Frontend: HTML5, CSS, JQuery, Javascript, Bootstrap, AJAX, SASS, Git, GitHub, APIs, DOM
Backend: MySQL, MongoDB, Express, ReactJS, Node, Handlebar, Webpack, Heroku, OOP, ORM, MVC, PWA, Insomnia

Projects

Streaming Services Tracker | *streaming-service-tracker* | Deployed

Back-End Developer

- *This app allows users to search for a movie/show and displays what streaming app it is currently streaming on.*
- *This app allows users to narrow down search between streaming apps. I worked on code to fetch api, manage github branches.*
- *Tools/Languages: APIs, Javascript, HTML.*

Adopt an Owner | *adopt-an-owner* | Deployed

Back-End Developer

- *This app allows people looking to adopt a pet to create a profile and be vetted by adoption agencies and shelters.*
- *This project allows for users looking to adopt only fill out one application and have a pet come to them rather than having to search multiple places. My responsibilities were creating routes to connect the servers, and create databases.*
- *Tools/Languages: JavaScript, HTML, Handlebars, MySQL, API.*

ECommerce Back End | *ecommerce-back-end* | Deployed

Full-Stack Developer

- *Creates a database that allows retail companies to keep track of their products and update as necessary.*
- *This allows ecommerce companies to better run and organize their products using a simple database. I created routes for their products based on their product tags and categories. I added data so it can be displayed in formatted JSON.*
- *Tools/Languages: JavaScript, MySQL, Sequelize, Express.JS, Insomnia.*
